WHEN TO START THE CASE FINISHING IN ORTHODONTICS

- EFFICIENT PROTOCOLS AND LAST-MINUTE SOLUTIONS

BRATISLAVA | 7TH NOVEMBER 2020 DR MARTIN BAXMANN

LECTURER

DR MARTIN BAXMANN is CEO and founder of Orthodentix, a group of four clinics specialized in orthodontic treatment and MyOrthoLab which delivers specialized orthodontic laboratory service all over Europe. He has developed various orthodontic appliances (e.g. Baxmann Mini Telescope, SymBlock, Baxmann Lingual O.S.A.S), instruments (e.g. Lingual Wire Adapter) and tools for radiographic diagnoses and case planning. He lectures regularly worldwide his one-year-course and also in single day courses on various topics. His special interests are biomechanics and wire bending, class II treatment, mini-implants and treatments with self ligating labial and complex contexts in simple and understandable ways.

COURSE TOPICS

Accurate Finishing is often seen as the highest level of orthodontics and it is definitely the most desired and admired skill for every orthodontist. That's why there is such a high demand on courses for it. But unfortunately most of these courses solely concentrate on wire bending as ultimo ratio rather than avoiding problems in the first place! Indeed really successful and efficient finishing does start much earlier during treatment. In Dr. Baxmann's LeanOrthodonics® the finishing starts right at the beginning. And that's for a reason. A careful planning process of all treatment possibilities, appliances and mechanics including all their possible side-effects build step one. Next learn how to apply the Baxmann Keys® and the idea of backwards planning. With this course you will never again miss any valuable treatment option and you learn how to successfully anticipate any problem that can arise. Use an evidence-based approach to choose appliances and mechanics that really work. Dr. Baxmann will additionally show simple, effective reproducible ways of trouble shooting and how to make clear and reliable decisions. And as the ultimate bonus let Dr. Baxmann's energy and enthusiasm inspire you to stay motivated and focused on the three most important goals for every orthodontist:

- 1. Produce outstanding clinical results
- 2. Make sure your patients are happy with your work
- 3. Work smarter not harder and love what you do
